

**DuraVane<sup>HV</sup>** high vacuum pumps (RVR-series): Lubricated rotary vane pumps for operating in the pressure range of  $7.5 \times 10^{-1}$  down to  $7.5 \times 10^{-3}$  Torr\*. (Partial final pressure range  $3.8 \times 10^{-1}$  to  $3.8 \times 10^{-3}$  Torr - McLeod). The pumps feature a compact design with very quiet operation (54-64dBA). Typical applications include refrigeration, air-conditioning and other high vacuum requirements.

- Heavy duty construction.
- Compact design, small footprint.
- Multi-frequency motor.
- Gas ballast valve is standard.
- Low noise level.
- Low maintenance.
- Air-cooled design.
- Direct drive.
- Simple to install.

\* = Total final pressure unless otherwise specified.
