

Vacuum Performance Assessment

Introducing...

The DEKKER Vacuum Performance Assessment

DEKKER can improve performance in your application by providing reliability, energy efficiency and specific vacuum application solutions – saving you time and money. Some of our customers have shown over 50% in energy savings alone.

How much can you save? It costs you nothing to find out. Our performance assessment is free!

DEKKER offers a complete product range to handle the most demanding manufacturing tolerances.

Various applications include:

- Altitude Chamber
- Assembly
- Autoclaves
- BioGas Production
- Cheese processing
- CNC routing (stone, wood, etc.)
- Deaeration
- Dehydration/Drying
- Distillation
- Evaporation
- Filling
- Filtration
- Fisheries
- Gas Recovery
- Glass Manufacturing
- Holding/Chucking
- Material Handling
- Medical/Dental/ Surgical Vacuum
- Packaging
- Soil Remediation
- Solvent Recovery
- Sterilization-Steam or ETO
- Thermoforming
- Vapor Recovery

A DEKKER Applications Engineer can lead you through an assessment of your operation and vacuum needs.

Call us today at 888-925-5444 for your free Vacuum Performance Assessment.
