

## WHEN TO CHANGE MY OIL

**How do I know if it is time to change the oil in my Vacuum pump?**

Vacuum systems are shipped with Dekker's specially formulated seal fluid. The suggested type of oil and oil change interval will be found in the IOM for the particular pump being serviced. If you have concern that oil is in need of changing before the suggested interval, Dekker offers free oil analysis. To have your oil sample tested refer to [HOW TO SUBMIT OIL SAMPLE FOR ANALYSIS](#).
